

ALTIS HIGH PERFORMANCE THINK TANK

THE EDGE OF CHAOS: Managing Complexity in a High-Performance Sporting Environment

September 13-15, 2019 - South Lake Tahoe

The totality of the interactions and interrelationships of the elements within the Sport Performance industry exist at the **Edge of Chaos**.

It is clear that while many of the specific challenges of our own environments are variable, much of the challenges involving the management of the complexities of our ecosystems share similarities regardless of the specifics of the environment itself.

Therefore, the ALTIS High Performance Think Tank is an opportunity to pool together perspectives from a multitude of high-performance environments, to share and discuss the challenges of operating within these environments, and to discuss the practicalities of our management strategies.
